Oak, White	11	2-3'	\$ 9.00	\$ 8.00	\$ 5.00	\$ 3.00		

NOTES

- 1-These Trees must live in pairs to bear fruit.
- 2- If trees contract blight, contact us for treatment procedure.
- 3-Frost Damage possible
- 4- Treat soil containing grubs with Diazinon
- 5- Plant in partial shade to discourage insect attack.
- 6-(2-1) grown 2 years as a seedling, 1 year as a transplant
- 7- Fast Growing
- 8-Spring Planting best, Fall planting not recommended
- 9-USDA- Soil Conservation ,Plant Materials center release
- 10-Shade Tolerant
- 11-Brine Tolerant
- 12- Alkaline Tolerant
- 13- Wetlands
- 14-Fall transplanting not recommended
- 15- Wild Pulled

Wildlife

- A-Deer
- B-Ruffed Grouse
- C-Cottontail
- D-Pheasant
- E-Turkey
- F-Quail
- G-Hummingbird
- H-Human
- J-Butterfly
- K-Bee
- +Strong Preference,
- *Winter-bearing seed holder, food source for wildlife
- IR-Insect Resistant
- I-Deer Resistant

FRUIT TREES

All Fruit Trees are \$25.00 each

Most Fruit Trees are Diploid Pollinators, Pollination is an important topic when growing fruit trees because many - but certainly not all - varieties require pollination from a compatible donor tree before they can set fruit. **Other Tree varieties may be available. Please ask for details.

AppleTrees	All tree stock: 1/2-5/8, 4-5' bare root	Quantity Ordered	Total
Summer Rambo *	EMLA 111 Semi-Dwarf- Mature Height 12-16ft. Originally from France but grown in North America since the 16th century, the Summer Rambo Apple Tree is exceptionally juicy with a subacid, aromatic flavor. Skin is greenish-yellow with a red blush and fruit is great for fresh eating, but especially valuable for sauce and cider. Ripening Time Early August		
Dandee RedTM*	EMLA 111Semi-Dwarf - Mature Height 10-12ft. If you like the flavor of McIntosh but wished it came in a crisper form, look no further than Dandee Red. It has that same pleasant McIntosh mild tartness in a crunchy, attractive package: skin blushed claret (a purplish red), flesh dazzlingly white. A surprisingly good keeper for such an early apple. Early August		
Buckeye Gala*	EMLA 111 Semi-Dwarf- Mature Height 12-15ft. Beautifully colored Gala. Fruit is bright red with distinctively dark red stripes. Great for fresh-eating, cooking, and baking. Keeps up to 7 months in proper storage. Ripens mid-late August.		
Honey Crisp*	EMLA 111 Semi-Dwarf -Mature Height 12-15ft. Very sweet, crisp and juicy, Med size fruit, red with orange and yellow stripes. Hardy and vigorous. Tolerates temperatures down to -40. Bloom time April. Fruit ripens early-mid September.		
Red Jonagold*	EMLA 111 Semi-Dwarf- Mature Height 12-15ft. Unique flavor makes the fruit luscious enough to serve by itself as dessert. This crisp super apple is a cross between the tart Jonathan and the sweet Golden Delicious.		
Gibson Golden Delicious *	EMLA 111 Semi-Dwarf Mature Height 12-15ft. Semi-dwarf tree producing yellow fruit with a sweet crisp flavor ripening in late September.		
Smokehouse*	EMLA 111 Semi-Dwarf- Mature Height 12-15ft. Reliable and productive. Precocious tree produces pleasant dessert apples with a red-striped skin tinged with yellow. Flesh is firm and juicy, perfect for fresh-eating, cooking, and baking. Lively flavor makes for excellent cider. Good keeper in proper storage. Antique variety, September.		
Macintosh*	EMLA111, Semi-Dwarf-Mature Height 12-15ft. Skin is intense red, taste is bold, sweet-sour, and somewhat acidic; texture is soft, with very aromatic flesh. Great for eating fresh and cooks down well for sauces.Tree growth is dense and drooping. Blooms in May. Blooms are white. Fruit ripens in early September		
Northern Spy*	EMLA 111 Semi-Dwarf -Mature Height 12-15ft. Large yellowish apple with light red striping. Cream colored flesh, juicy, crisp, rich, aromatic flavor. Excellent for eating fresh & cooking. Not good for drying. Trees grow upright with large growth habit. Blooms early-mid May. Bloom color pink-white. Fruit ripens in early October.		
Red Delicious *	EMLA 111 Semi-Dwarf- Mature Height 12-15ft. Fruit is firm with red skin with darker red streaks, and five "points" on the bottom. Has white flesh that is aromatic and sweet, with a bit of a crunchy texture to it. Keeps very well, and is often used for decoration. Good for eating. Blooms in April. Bloom color is white. Fruit mid-late September.		
Golden Supreme	EMLA 111 Dwarf-Mature Height 10-12ft. Exceptional flavor and storage life. Tree produces irresistible golden apples with a pink blush. Popular for its mildly sweet, sub-acid flavor, with tones of cider and honey. Great for fresh eating, salads, desserts and especially juice.		
Plum Trees			
Methley *	Medium sized fruit is reddish purple with deep red flesh that is sweet and mild with a distinctive flavor. Vigorous upright tree does well on most soils. Early blooms are bud hardy and is a good pollinator for early varieties. Self-fertile and a heavy bearer. Ripens over a long period, requiring several pickings from mid to late July throughout early August. An excellent choice for northern climates.		

Early Magic * Tree is moderately vigorous with open, spreading growth habit. It is precocious and productive. Fruit ripens around mid July. Requires multiple picking. Fruit size is medium. Skin is purplish-red and covered with waxy bloom giving it a bluish cast. Flash is amber-yellow, firm, juicy, sweet and very good tasting.		
Red Heart * Delightfully sweet. The fruit from this tree features deep red skin and fine-grained, bright red flesh. Great for jams, sauces and chutneys. Heat-tolerant. Semi-freestone. Originates from University of California in 1950. Ripens in August.		
Stanley * Medium to large, oval dark blue fruit. Flesh is very sweet, firm and tender with fine grain. Flavor is rich. Freestone. Excellent for canning, preserves, drying or eating out of hand. Bears early, blooms late and is a heavy annual producer. The most popular of all prune plums. Trees are vigorous and self fertile, however, yield increases when cross pollinated. Ripens early September.		
Peach Trees		
Elberta * An old favorite large yellow peach with a deep golden yellow skin blushed with red. Skin is fairly tough. The flesh is tender and juicy, with an excellent texture and quality. Excellent for desserts, freezing, canning and jam. Ships well. Trees are hardy, productive and disease resistant. Fruit Ripening Time: Early September		
Glohaven * Large, almost round, uniform peach is mostly red with deep yellow ground color. Flesh is firm and resistant to browning. Excellent quality. Tree is vigorous with moderately hardy buds. Fruit Early - mid August.		
Redhaven * The standard of all early peaches. The color on this medium sized round peach is red over golden yellow. Flesh is very firm, smooth textured and of good flavor. Highly versatile. Requires heavy thinning. Winter hardy. Fruit Ripening Time: Early August		
Pear Trees		
Bartlett * Large, heavy bearing variety with excellent quality. Long considered one of the choicest canning varieties. Bartlett accounts for about 75% of the US and Canadian pear production. Tree is vigorous and very productive. Fruit Ripening Time: Late August		
D'Anjou * A very high quality dessert pear. Skin is light green in color and does not change to yellow upon ripening. A good pollinator for Bartlett. Flesh is very juicy, sweet and rich in flavor. Fine texture. The tree is very hardy, bears early and is quite blight resistant. Stores and ships well. Fruit Ripening Time: Mid September		
Red Bartlett * Imagine everyone's favorite pear, the Bartlett, all dressed up in a beautiful, crimson-red skin. That's Red Bartlett! Bartlett is the pear to which all others are compared, and, beginning with its introduction in 1797, it quickly became one of America's favorites. Red Bartlett is an improvement on this old faithful – with a bright-red color and higher sugar content. Great for eating fresh or canning and, with its brilliant-red skin, Red Bartlett makes a dramatic dessert pear. Harvest in late August.		
Bosc * A large russet pear with white flesh and an excellent rich, sweet, juicy delicious flavor. Rapidly becoming a major commercial variety. Tree is vigorous, somewhat upright and productive. Requires a pollinator such as Bartlett. One of the best long keeping varieties. Fruit Ripening Time: Late September/early October		
Strawberries - Bundles of 25= \$25.00 Circle choice Earliglow - Jewel - Sparkle		
Blueberries and Raspberries available. Please call for details.		
Asparagus Mary Washington - Jersey Knight- Purple Passion Bundles of 25 = \$25.00
